TUESDAY, MARCH 18, 1873.

The Parties of the Future, in West Va. and Elsewhere.

The Greenback Independent formally reads Gov. JACOBI out of the Democratic party.

"We hope," says the Independent, "to hear no more of our Democratic Governor. Let him stand and remain where his faith has led him, and where his connections and associations will be more pleasant and congenial than they can ever, by possibility, be in the Democratic party, and let him carry with him the comforting assurance that his departure will leave no gap, and occasion no sorrow." This is only one of numerous evidences that the anti-JACOBI Democrats have fully resolved to crush the Governor and his supporters or drive them out of the party. They have left Gov. JACOBI and his friends but two things to choose between, either unconditional surrender or an equally unconditional fusion with the Republicans. There is no room for a third party in this State. There are not enough of the independent Democrats to make a party that can possibly be successful. There are enough independent, cent Democrats and Republicans, if cordially united for reform, to elect the next Legislature and take the control of public affairs in the State out of the hands that now misdirect them. Such a union is the necessity of the situation in this State, from which there is no escape. There is no particular need of haste about it, but it has to come, and Gov. JACOBI's friends may as well begin to accustom themselves to the idea.

There is nothing unnatural in such a fusion, nor will it be peculiar to this State. It is the movement of the future with reference to national politics. A large and influential wing of the Democratic party will be found supporting General GRANT's administration before the close of the next term, and by that time it will not be surprising if the administration party will be more Democratic than a Republican party—that is, that it will embrace more men who once acted with the former party than it will of original Republicans. Parties are constantly and steadily undergoing these transformations. If we do not mistake the signs of the times, General GRANT himself is preparing to receive and recognize such an addition to his support. The administration party has alienated and lost a large percentage of its original Republican element. Its place will be supplied from the Democratic ranks; and this double movement—this ebb and flow—will probably go on till the transformation of parties will be far more complete than many now foresee. It is, we believe, through a gradual movement of this kind that the elements that once made up the Democratic party will again come into control at Washington. They can never do it in their own name and professing their own principles. But in a certain sense, and to an appreciable degree, the movement we thus speak of as an existing fact, though one that has not yet received public recognition, is on one side founded on the idea of that half historical, half fabulous story of the Trojan horse. On the other, it will be welcomed and encouraged—we believe it already foreseen and prepared for by Gen. GRANT and his shrewd advisers—as repairing losses which the Administration party is bound to feel more than it has yet felt on account of events that need not be recited, prominent among them the corruptions and scandals attending and developed during the closing session of the 43d Congress. We have no sort of doubt that the independent wing of the Democratic party in this State will soon be in harmony with Gen. GRANT's administration and that it will have due recognition from him. And so we say to those gentlemen in the lead of it that it is quite useless for them to temporize with the Camdenites with any idea of a possible reunion, or to be so shy of their future, and natural, and inevitable allies, the Republicans.

THE BOILER BILL.

Another Scheme to Tax the Manufacturing Interests of the State—A Plum for Somebody.

A correspondent at Charleston sends us the following bill now pending in the House of Delegates. He remarks that it ought never to pass, but that there is a strong pressure to pass it. It appears on its face that it is intended more as a device for raising a little revenue out of the manufacturing interest than for any legitimate object. In addition to making places for needy politicians, it is to create a "boiler fund," but what is to be done with the fund does not appear. Our correspondent intimates that the biggest end of the job is in requiring a certain description of low water indicator. We suppose some fellow who had got a thing of that kind, and who also held the office for a term of four years, unless sooner removed for good cause. That the supervising inspector shall appoint a local inspector in each congressional district of this State, who shall also be a theoretical and practical engineer, and who shall hold his office for the term of four years, unless sooner removed for good cause, by the supervising inspector. The supervising inspector shall have power to remove any of the local inspectors for incompetency, negligence of duty, or other sufficient cause.

2. That the supervising inspector shall furnish each local inspector, at the expense of the State, with a hydrostatic pump, and all the necessary forms, or blank certificates of inspection, and blank books to carry out the provisions of this act, and keep a correct record of all inspections of steam boilers as reported to him by the local inspectors, which record shall be filed annually in the office of the secretary of the State.

3. The local inspector shall as soon as practicable after the passage of this act, and annually thereafter, proceed to inspect each boiler within the district for which he is appointed, and the strength of each boiler shall be tested with a hydrostatic pump, and the said local inspector shall limit the pressure of steam to be applied to or upon such boiler, and when the boiler under test will, with safety bear the same, the pressure desired by the owner shall be the one certified; and the hydrostatic test shall in no case be less than fifty per cent above the limit of the working pressure allowed. There shall be attached to each boiler a good safety valve, and a reliable low water indicator that will give an alarm when the water falls to the prescribed low water line, and of such construction as shall be tested and approved by the supervising inspector.

4. That it shall be unlawful for any person to use a steam boiler for the purpose of generating steam, without first having the same inspected and equipped with the necessary appliances of this act, after the owner thereof has been applied to by the inspector, whose duty it is to inspect such boilers; and if any such boiler be so used, the owner or controller thereof shall forfeit and pay a penalty of two hundred dollars.

5. The owner or controller of any steam boiler, for testing and inspecting such boiler, four dollars, and one dollar for the certificate of inspection, but no charge shall be made for the inspection or certificate of inspection of boilers owned by the State or any county. All monies received by any inspector shall, within twenty days or sooner, when convenient, be paid over to the Sheriff of the county in which the inspection is made, and the inspector shall be receipted for same. In case the owner or controller refuse to pay the test for inspection, or to have their boiler inspected under the provisions of this act, he shall forfeit and pay a penalty of ten dollars a day while he runs such boiler; and the owner or controller of such boiler, who shall refuse to pay the test for inspection, or to have their boiler inspected under the provisions of this act, he shall immediately report the case to the prosecuting attorney in the county where the parties reside. That each local inspector shall make, in a proper form, a tabular statement at the end of every month to the supervising inspector, of the inspections made by him, of the monies received by him for such inspections in each county, and of the names of the persons from whom he received it; and of any other sum or sums of money received by him in the discharge of his duty as an inspector, of each of which he shall pay over to the Sheriff of each county in which he received such money. That no certificate of inspection shall be granted until the provisions of this act have been fully complied with.

6. That the supervising inspector, and each local inspector, shall give bond to the State of West Virginia for the faithful performance of their duties, in a sum not less than one thousand dollars, with two freeholders worth not less than one thousand dollars each, who shall be deposited with the Auditor of the State for safe keeping, which bond shall be executed by both principal and securities to the satisfaction of the prosecuting attorney of the county within which said inspectors may reside.

7. That the local inspector in each district shall be allowed annually, for his services, all the fees, fines and penalties collected and paid over in his district: Provided, in no case shall the amount exceed six hundred dollars per annum, which shall be paid by the Treasurer of the State, as the salaries of other State officers are paid. The supervising inspector shall be allowed annually, for his services, all the fees, fines and penalties collected and paid over in the State, after deducting therefrom the several amounts due to the local inspectors, and all other expenses incurred by the State in the execution of this act: Provided, The amount shall not exceed the sum of one thousand dollars per annum.

8. All prosecutions for forfeitures, penalties, or fines for the violation of any of the provisions of this act, shall be by action, in the name of the State of West Virginia; and it shall be the duty of the prosecuting attorney of the county in which the person or persons reside guilty of such violation upon information of the supervising or local inspector, to institute and conduct such suits; and such prosecuting attorney shall be entitled to receive from the Sheriff, for his service in this behalf, twenty per cent on all monies collected and paid over by him; and all monies arising from such suits, or collected under the provisions of this act as hereinafter provided, shall be paid over to the Sheriff, by the prosecuting attorney or inspector collecting or receiving the same, within ten days or sooner when convenient.

That each Sheriff shall keep a correct account of all monies received by him under the provision of this act, which shall be designated "The Steam Boiler Fund," and he shall pay the same over monthly to the Treasurer of the State, who shall keep a like account of such fund, and make an annual report of the receipts and expenditures of the same under the provisions of this act.

9. That all locomotive boilers owned by persons residing in other States, and running through any part of this State, shall be subject to the provisions of this act, as if they were locomotive boilers owned in this State. However, that this act shall not apply to locomotive boilers having a certificate of inspection granted under a similar act of another State.

10. This act shall take effect from and after its passage.

"Here our correspondent says, 'is where the whole job is covered up.'"

DIED.

FREDERICK—On Saturday, March 15, 1873, at 820 N. E. Adams, wife of John Fredrick, aged 30 years.

The funeral will take place from the residence of her husband on Main street, between Washington and Adams, on Tuesday, March 19, at 3 P. M. Friends of the family are invited to attend.

GETTYSBURG KATALYSINE WATER.

The United States Dispensary, the authorized record of our Materia Medica, classes this water with the most renowned Alkaline or Carbonated Sprites of Europe. It is not only a refreshing beverage, but it is also a powerful and reliable remedy for all ailments arising from indigestion, flatulence, and other disorders of the stomach and bowels. It is also a powerful and reliable remedy for all ailments arising from indigestion, flatulence, and other disorders of the stomach and bowels.

DR. LONGDON.

Chronic Bronchitis.

A Disease that should Always Excite Alarm.

Few persons outside of the medical profession know the fact that the Bronchial Tubes are almost without and constitute a large portion of the Lungs, and that Bronchitis is not only a disease of the Lungs but affects those parts which become the seat of Tubercular Consumption.

For want of this knowledge many neglect the Bronchial Affection until the lungs are so diseased, the Lungs impaired and the inevitably fatal result developed.

In most consumptive cases the first symptoms are those of Catarrh of the Lungs and the greater number of these first attacks are mistaken for "Common Colds," and allowed to run on to a fatal termination.

If the patient is Scrofulous or inherits small weak Lungs a delicate constitution, the earlier will the Great Destroyer accomplish his fearful mission.

Catarrh when attended with Bronchial Irritation and constitutional disturbance uniformly leads to the same result.

A "Cold on the Chest" inflames and thickens the mucous membranes which line the Bronchial Tubes and thus diminishes their capacity for supplying the Lungs with air, depriving the body of an element most essential to health and even food or drink and disease is the inevitable consequence.

This condition gives rise to a dry hacking cough which is followed by expectoration, at first scanty, gray, frothy, viscid and is sometimes tinged with blood.

This is a mere theory, but a melancholy fact which Dr. Longdon has been verified in hundreds of cases, and should awaken in the minds of this large class of invalids the great importance of seeking relief before it is too late.

Dr. Longdon's Remedy, Druggists, and all who sell it, are invited to test his treatment and prove its efficacy.

On a constitutional examination, advice and treatment within the reach of all.

Medicines for all Diseases by mail and express.
